

PRESS RELEASE

RADIO/TELEVISION SERBIA JOINS HOME2US LINEUP

Widely watched government broadcaster makes American debut

Herndon, VA – June 10, 2010 – Positioned to quench the increasing appetite for global content among ethnic audiences in the U.S., Home2US Communications, Inc., a leading provider of top international television and radio programming to ethnic audiences across North America and beyond, today announced Radio/Television Serbia (RTS) has joined Home2US DTH platform on its AMC-4 satellite.

With an estimated 2.5 million Serbians, Croats and Bosnians living and working throughout America, RTS is expected to be a popular addition to a growing lineup of 55 international channels. Radio/Television Serbia is a highly regarded government broadcaster known for providing a broad range of programming, including original documentaries, news, movies and children's favorites. Radio Beograd is an important part of the newest content offering and the long list of Eastern European channels on Home2US.

"Radio/Television Serbia is an exciting blue-chip addition to our Home2US international lineup," said Emrah Ozkan, President and CEO of Home2US, which has imported some of the best global content to U.S.-based audiences for almost ten years. "The SES WORLD SKIES satellite fleet provides the reliability, reach and advanced technologies we need to further expand our content and access choices," Ozkan noted, referring to Home2US' upcoming move to MPEG-4 and HD delivery.

"With the addition of quality channels from the likes of Radio/Television Serbia, Home2US has masterfully compiled the best international DTH programming lineup available across America," said Nancy Dube, Senior Vice President of Media Sales & Marketing for Home2US. "In addition, we are also very pleased to see the continued growth trajectory in our ongoing content aggregation and distribution relationship with Euro-World Network, Inc., which was instrumental in sealing this particular deal with the Serbian government broadcaster.

"We are thrilled that RTS – Radio Television Serbia; turned to EURO-World Network to reach their target audience in North America, RTS is the latest to join EURO-World Network's European channel line-up and Home2US' growing neighborhood of international television and

radio channels on AMC-4 satellite platform” stated Chris Williams, the President & CEO of Euro World Network. “We are excited to further develop our mutually beneficial partnership with Home2US; it ensures a positive future for our growing businesses in the Americas.”

About Home2US

Home2US Communications, Inc. delivers the best international programming to direct-to-home, video-on-demand, and pay-per-view audiences and mobile device users across North and South America.

Founded in 2003, the firm leverages the reach and reliability of SES World Skies’ AMC-4 satellite to deliver both television and radio programming to culturally diverse audiences across the U.S., Canada and Central & South America. Home2US subscribers can choose from more than 55 channels. Later this year, Home2US will also deliver access to popular programming and pay-per-view events via its brand new MPEG-4 DTH/Hybrid IPTV platform. Based in Herndon, Virginia, Home2US has U.S. offices and operations in Maryland, Georgia, and California and strategic international locations around the globe.

About EURO-World Network:

EURO-World Network, Inc. (EWN) based in Murrieta, California is a media company that markets and distributes various international television and radio services to ethnic audiences in North America, South America as well as Australia & New Zealand. The company specializes in satellite distribution, cable distribution, IPTV, marketing & advertising, subscriber acquisition and subscriber management services. EURO-World Network delivery is tailored to suit all existing and emerging technology for each of its channel partners. Together with international broadcasters, EURO-World Network services the international community’s unique blend of cultures with timely, cost-efficient and creative broadcast solutions by delivering top-quality television and radio programming, direct from their homeland into their homes.
